Defect Report for KidZoo App						

1	Age dropdown list not showing the numerical values according to grades selection	e.g. max age is 13 & max grades are 12th				
2	Age & Grade drop-downs are not showing vertical scrolling					
3	Age dropdown has Date-picker icon					
4	"Why we ask" alert question message should include (?) sign in Red colour					
5	Cancel option should consist a proper button					
6	Before actual cancellation it should ask for confirmation from the parent					
7	Instead of "optional" in any particular text field, Red Asterisk is required for the mandatory fields e.g. Last Name fields					
8	Grades should match with the age of the child	e.g. Age 2 & Grade 10th should Not be accepted	e.g. Age 13 & Grade Kindergarten should also NOT to be accepted			
9	Successfully registered message should be received by the parent after adding child's details					
10	In case of Parents, Instead of Gender it should ask for Mother/Father as Parents Details					
11	Instead of weekdays displays from Saturday >> Friday, it should display from Monday onwards					
12	"Why we ask" should answer the importance of Grades with that of dates & Not Data privacy	e.g. Maybe timelines availability w.r.t. to the Grades/Age	Seniors can have permission for late in the evening, while juniors/kids in early in the evening			
13	"Save" option required for every child's info or for the particular parents info for the page					
14	"Edit" option required in Registration Page in case any field requires any edit	e.g. Grades, Age				
15	"Last Name" field of every child should be validated with that of Parents Last Name	e.g. Parents Last Name : Sinha, then Child's Last Names : Khan, Srivastava, Rastogi should Not be accepted				

16	In case, Parent is trying to add 4th Child Info, then it should sent a pop-up saying, "You can enter details of Max. 3 children"	After adding details of 3rd children, "Add another child" Button should Not be visible				
17	Registration Page should be renamed as Child's Registration					
18	"Add another child Button" should be replaced by (PLUS icon)					
19	Cancel Label is Not proper aligned, it should be at the bottom of every particular child info with center alignment					
20	Age dropdown list should Not display min age as 1	As, 1 year old kid don't even go to the playschool	It should be atleast 3 to 16 year of age			
21	"Never" label on the slider screen is static though all the random timelines have been selected	e.g. from duration of 1 to 4/5 hours				
22	Sliders are showing 8AM - 8PM for the Senior children also	It should be after 8PM				
23	Text explanation on Avatars selection Page should be on the top of the page	Below, "Choose which of your Kid(s)"				
24	Image size should be a bit smaller on the Kids selection Page as it displays Images of only 3 Kids vertically					
25	KidZoo App should take Location info also in order to search friends in the same location who are available at that time to play					
26	App didn't ask for School information					
27	App should have ask to fill kids interests,hobbies to match the like minded children around them	e.g. Drawing, Dancing, Games, Sports, Cartoons etc				
28	In Add Friends page, a kid is in 5th Grade but Not associated to any school	e.g. Aarya G				
29	In Add Avatars page, display of Age is Not required	Name below image is all it requires to identify Kid				
30	Instead of providing Hamburger Icon on the right hand side with features like Edit details, it should be in the left side of the screen as side menubar	"Edit interests" should be replaced by Add Interests				

31	Copy icon from "Ask Us anything" particular queries should Not be present					
32	Text field "Ask Us anything about KidZoo" with Send icon is irrelevant					
33	Settings page should consists of "Ask Us anything", "Share with others" & "Log out" feature					
34	Search Friends in contact list requires KidZoo App installed in their Mobile Devices too					
35	Before asking actual permission to send message to contact list, it is taking me to the existing WhatsApp chat of that particular person	It should take permission from the parent before taking to that particular chat, thus, breaching data privacy of that particular user as a Kid/Parent				
36	There should be Wrap text available in case Name of the search result is Big enough for 1 liner space					
37	Slider timeline should be of 24 hours					
38	Slider timeline should denote the breakpoints for every particular hour					
39	Registration Page should register one children at a time with all the details e.g. Interests, School, Location, Food, Grade, Age etc					
40	There should be some process to receive Group Code to Join any of the Groups listed					
41	Create Group feature should also be there
